

JAAR LLC

CAPABILITY STATEMENT

ELECTRONIC SECURITY | LOW VOLTAGE | SECURE INFRASTRUCTURE

Virginia-Based Small
Business
Government & Commercial
Prime or Subcontractor

JAAR LLC is a Virginia-based security systems and low-voltage infrastructure contractor delivering integrated electronic security, structured cabling, cellular enhancement, and secure infrastructure support. JAAR combines direct-owner oversight, experienced field execution, and federal technical expertise to support mission-critical facilities.

20+ YEARS

Electronic security & low-voltage

53

Personnel managed

30 LOCATIONS

Multi-site deployments

100+

Security centers & scanners

12+ YEARS

Federal cyber & infrastructure

CORE COMPETENCIES

- CCTV and IP video surveillance systems
- Access control and credential management
- Video Management Systems (VMS)
- Intrusion detection, perimeter and gate security
- Cellular signal enhancement and DAS
- Structured cabling, racks and network infrastructure
- Testing, commissioning, training and closeout
- Maintenance, troubleshooting and lifecycle support

REPRESENTATIVE EXPERIENCE

- Supported CCTV, access control, credential management and networking across approximately 30 locations
- Integrated PA, CCTV, DAS and communications systems in a nine-level commercial headquarters facility
- Delivered SureCall RF distribution, antenna infrastructure, testing, optimization and commissioning
- Supported federal data-center engineering, ACAS/Nessus, Splunk, Linux security and compliance programs
- Managed teams of up to 53 personnel supporting mission-critical operations

DIFFERENTIATORS

Direct-Owner Oversight

Founder involvement from capture and planning through implementation and closeout.

Experienced Field Leadership

20+ years of electronic security and low-voltage field experience within the team.

Integrated Coverage

Coordinates cameras, access control and cabling with supporting network and server environments.

Technology Partnerships

Experience with Hanwha Vision, Axis Communications, SureCall and ADI Global.

Federal-Ready Execution

Disciplined documentation, change control, testing, commissioning and compliance support.

Responsive Delivery

Safety-focused execution, stakeholder coordination and dependable customer follow-through.

1 PLAN

Scope, schedule, risks

2 COORDINATE

Client, GC, vendors

3 IMPLEMENT

Install, configure, document

4 VERIFY

Test, commission, remediate

5 CLOSE OUT

Training, records, turnover
